Education

Concordia University

Bachelor of Computer Science Honours

Expected Aug 2026

GPA: 3.85

- **Space Concordia Robotics Member (2025); Projects Director, IEEE Concordia (2024)**
- In-Course Bursary (2024–2025); Dean's List (2023–2024)
- Coursework: Data Structures and Algorithms (A+), Operating Systems (A), OOP 1&2 (A)

Skills

Programming: Java, C, C++, Python, JavaScript, PHP, SQL, MARIE Assembly

Frameworks: PyTorch, TensorFlow, OpenCV, ROS2, SFML

Tools: Docker, Git, Oracle Fusion, Jira, MS Project, VMware, Wireshark, Maple, VS Code

Languages: English, French, Arabic (Fluent), Spanish (Beginner)

Work Experience

Undergrad Robotics Researcher (Contract), McGill Mobile Robotics Lab - Montréal, QC Fall 2025

- Assisted in developing and documenting **DexSuite**, a framework for dexterous robotic manipulation
- Engineered 1-to-1 mapping of user movements from a **Vive controller** to the Genesis simulation environment for **5 Manipulators and Grippers**
- Contributed to a research paper based on this work, **pending publication** (expected November 2025)

Teaching Assistant (Contract), Concordia University - Montréal, QC Fall 2025

- Evaluated **UML diagrams** and design-to-implementation mappings, providing feedback to **70+ students**
- Supported 4 student teams in **requirements documentation** and **standards'** adoption

Oracle Consultant (Internship), Alithya - Montréal, QC Fall 2024

- Contributed to the integration of **Oracle Fusion** for Québec Health Ministry, unifying **hundreds of medical facilities'** ERP systems
- **Identified and documented 50+ system defects** using **Postman** (API testing) and **Jira** (bug tracking)
- Presented deliverables to VP-level stakeholders and **earned a return offer** for strong performance

Personal Projects

Mars Rover – Space Concordia Robotics (Team of 10+) Fall 2025

- Programmed 3D-SLAM mapping in **ROS2** using **LIDAR** for autonomous terrain reconstruction
- Deployed motion-planning stack on **NVIDIA Jetson Nano** for real-time obstacle avoidance
- Validated sensor fusion accuracy through **Gazebo simulations** on Ubuntu Jammy

Concordia 3D Virtual Tour – ConUHacks IX (Top 5 out of 180) Winter 2025

- Developed an interactive 3D web tour of Concordia, **gaining the Dean's attention**
- The website allowed users to traverse the university at **120+ FPS**
- Integrated a **Hugging Face API chatbot** for guided navigation and real-time responses

RC Car – IEEE Concordia (Team of 8) Summer 2024

- Designed an **ESP32-based RC car** with low-latency wireless control and real-time telemetry
- Integrated a **VR FPV camera** and **OpenCV face tracking** for autonomous turret aiming

Dungeons and Dragons RPG – C++ Game Development (Team of 4) Winter 2024

- Created an **RPG engine in C++ with SFML** featuring enemies and player progression
- Implemented **design patterns (Observer, Strategy)** for code scalability and maintenance
